

SAVORTEX *EcoCurve* 550D Setup Guide

Before Installation

1. The *EcoCurve* 550D requires a 2G/3G or 4G connection, before receiving the dryers please check the locations they are to be installed. A simple test for this is to use your own mobile phone to check it has reception in the areas of installation
2. You will receive the SIP Setup Document which asks for the following information:
 - Users requiring access to the online portal
 - Washroom Information including; Floors, Locations and Gender

During Installation

3. Unpack the dryer and follow the instructions to mount the dryer on the wall
4. Please update the SIP Setup Document specifying where each dryer is installed using the serial number on the side of the dryer

After Installation

5. Return the SIP Setup Document to SAVORTEX to complete your portal setup, you will receive user logins for each user once they are setup
