

SAVORTEX®

A Smart Energy Saving Revolution

Innovators of the award-winning IoT (internet of things) adDryer and EcoCurve Smart hand dryers
British technology company SAVORTEX® in partnership with ARM® introduces a transformational new range.
Using the power of data, we are raising the bar in ensuring that hand sanitisation can keep buildings occupiers safe.

The SAVORTEX Smart Hand Sanitiser

Designed and Manufactured in Britain, Contactless & Internet connected.

It's the game changer!

**Transform hand hygiene standards, reduce maintenance costs
and increase profitability**

The SAVORTEX Sanitiser Range

Features and Benefits

Built on ARM® connectivity, the meticulously designed SAVORTEX Smart Hand Sanitiser offers non-touch and high-volume liquid dispersal technology. It alerts building managers when sanitiser is running low and in need of a refill, which helps to avoid service disruptions and improve operational efficiency.

SAVORTEX Smart Hand Sanitisers are internet-connected and track usage in real-time. They alert facilities managers to potential hygiene risks if users do not sanitise their hands, with the ability to allow or deny access if required. The smart data enables hygiene scoring, which drives the most optimum sanitisation standards and makes the workplace a safer environment to carry out activity.

Furthermore, the range is available with an in-built full motion video display screen for real-time hygiene messaging or advertising.

The SAVORTEX range is data-driven, efficient, cost/resource saving and hygienic. It's a game changer!

SAVORTEX Hand Sanitiser - RRP £199.99*

- Slimline: Protrudes just 134mm from the wall
- Hygienic: High Volume non-touch liquid dispersal. Meets EN 1500:2013
- Reliable: 3-year parts and 1 year labour warranty
- Sustainable: Manufactured in the UK. 4mm thick vandal resistant plastic construction
- Low Maintenance: Large 2.1 L dispenser with quick feed for refills

Smart (Internet Connected), transform hand hygiene

SAVORTEX Smart Hand Sanitiser - RRP £299.99*

(data fees apply)

- Internet-connect (WIFI/GSM): Reports users who don't sanitise their hands as a hygiene risk**. Review data and prevent or allow access to an area in real-time.
- Data Analytics: The solution comes with a secure cloud-based management system for analytics to drive resource efficiency.
- Low Maintenance: large 2.1 L dispenser. Alerts building managers when dispensers need refilling based on usage.

Raise awareness, improve hygiene and drive revenue

SAVORTEX Full Motion Hand Sanitiser - RRP £599.99*

(content management fees apply)

- Engage Users and Drive Revenue: Displays full motion video messages, improve hygiene and profitability
- Low Maintenance: Alerts building managers when dispensers need refilling based on usage.
- Internet-connect (WIFI/GSM): Reports users who don't sanitise their hands as a hygiene risk**. Review data and prevent or allow access to an area in real-time.
- Data Analytics: The solution comes with a secure cloud-based management system for analytics to drive resource efficiency.

Smart Data & Remote Management

The SAVORTEX Smart Hand Sanitiser and Full Motion are internet-connected, which allows them to record real-time usage data and report it to the SAVORTEX® SIP Intelligent Cloud portal. The data intelligence gathered maps trends and creates scoring criteria to encourage and drive optimal hygiene standards in the workplace, creating the safest place to carry out activity. In addition, the data allows for collaboration and cross-functional continuous conversations between stakeholders, with the aim of changing user and organisational behaviour towards better workplace hygiene.

SAVORTEX SIP Data and Accountability

- User friendly & actionable data intelligence
- Real-time hygiene risk alerts
- Improved hygiene standards & user behaviour
- Meet and maintain ISO/CSR reports

The Sanitiser Full Motion provides an easy way to display hygiene messaging, news or announcements in minutes

Create eye-catching internal marketing content in minutes

Choose from hundreds of professionally designed ads or try our easy-to-use AdWizard. You can quickly edit the content using a simple web form, animate the text and images, then publish it to your screen. No technical expertise required.

Schedule ads to play on the day & time of your choice and at multiple locations

Plan in advance and ensure your content is seen; Perfect for sending out time-sensitive messages or promoting offers at specific times of the day.

Drive advertising revenue

Take advantage of adDryer's media agency relationships or use your own agency and drive paid content and let your investment pay for itself

Competitor Analysis

SAVORTEX's IoT capabilities significantly reduce hygiene risks, improve health & safety, reduce cross-contamination, and lessen the manual labour and maintenance needed compared to traditional sanitisers.

					
	SAVORTEX Sanitiser Range	QBIC	Aquarius	Snow Fall	Mini Box
Non-touch dispersal	Yes	No	No	Yes	n/a
Remote Feed	Yes	Manual	Manual	Manual	Manual
Data Reporting	Yes	No	No	No	No
Hygiene Alerts	Yes	No	5	5	No
Warranty	3	1	1	1	1
Liquid Refill Alert	Yes	Manual	Manual	Manual	Manual
Video Option	Yes	No	No	No	No
Cost	£199/£299	£189	£15.98	£283.50	£70.22

Other sanitisers have no data reporting capabilities, and thus have no way of identifying hand hygiene risks or inspiring positive behaviours. These sanitisers also require manual labour to check for liquid refills, and are therefore high in maintenance needs and come with a limited life.

The SAVORTEX range are designed and made in Britain and offer unrivalled sustainability, eliminating the problems identified above.

* Data fees apply

Technical Specification

Installation

Securely fix the mounting bracket to the wall at the desired location. The dispenser should be mounted vertically on solid substrate wall or podium with a weighted base.

When required, align the main unit over the mounting bracket, ensuring the top two hooks are secure.

Align with the corresponding openings in the rear. The main unit should be held flush with the wall.

Lower the unit slowly down to engage with the hooks until the lower face is flush with the bottom edge of the bracket.

Fix the unit to the bracket with the two anti-tamper screws.

Refilling

Using the secure key, open the filler door on top of the sanitiser, and using the filler funnel slowly pour the liquid until full. You will be able to confirm the tank is full when liquid starts to fill in the hopper below the filler door.

Recommended Installation Height

Distance between floor height and dispenser outlet

Gentlemen: 1080mm

Ladies: 980mm

Children & Wheelchairs: 850mm

Operation

Intelligent non-contact infrared hand detection sensors

Intelligent data monitoring per second feature

Intelligent self-cleaning / non-drip nozzle

1.5L internal tank with 3mL liquid dispersal

1080p HD Video Screen powered by Intel

Integrates with external building management systems

Construction

Front Cover: ABS

Inner Chassis: ABS

Manifold Front/Back/Nozzle: ABS

Back Plate: Steel

Antimicrobial additive for protection against degradation and bacteria

Colour finish: White (others on request)

Net weight: 2 kg / Packaged weight: 3 kg

Standard Guarantee

3 year parts, 1 year labour guarantee

Buying options

Direct purchase

Please email our sales team at sales@savortex.com for a quote.

Become a supplier/wholesale prices

We are always looking for like-minded partners to supply our products. We would be delighted to invite your organisation to tender to partner with us.

Our promises

We will continue to design and build sustainably with the environment, and public health and safety in mind, using local suppliers where possible.

We will continually invest in research and development and in our design to achieve lower energy consumption, improve performance, and help you meet your energy reduction targets.

We actively support charities such as Children Plus and Water Aid. If you would like to find out more please register on our website.
